

Rapid analysis of Mozambique Globalmix data

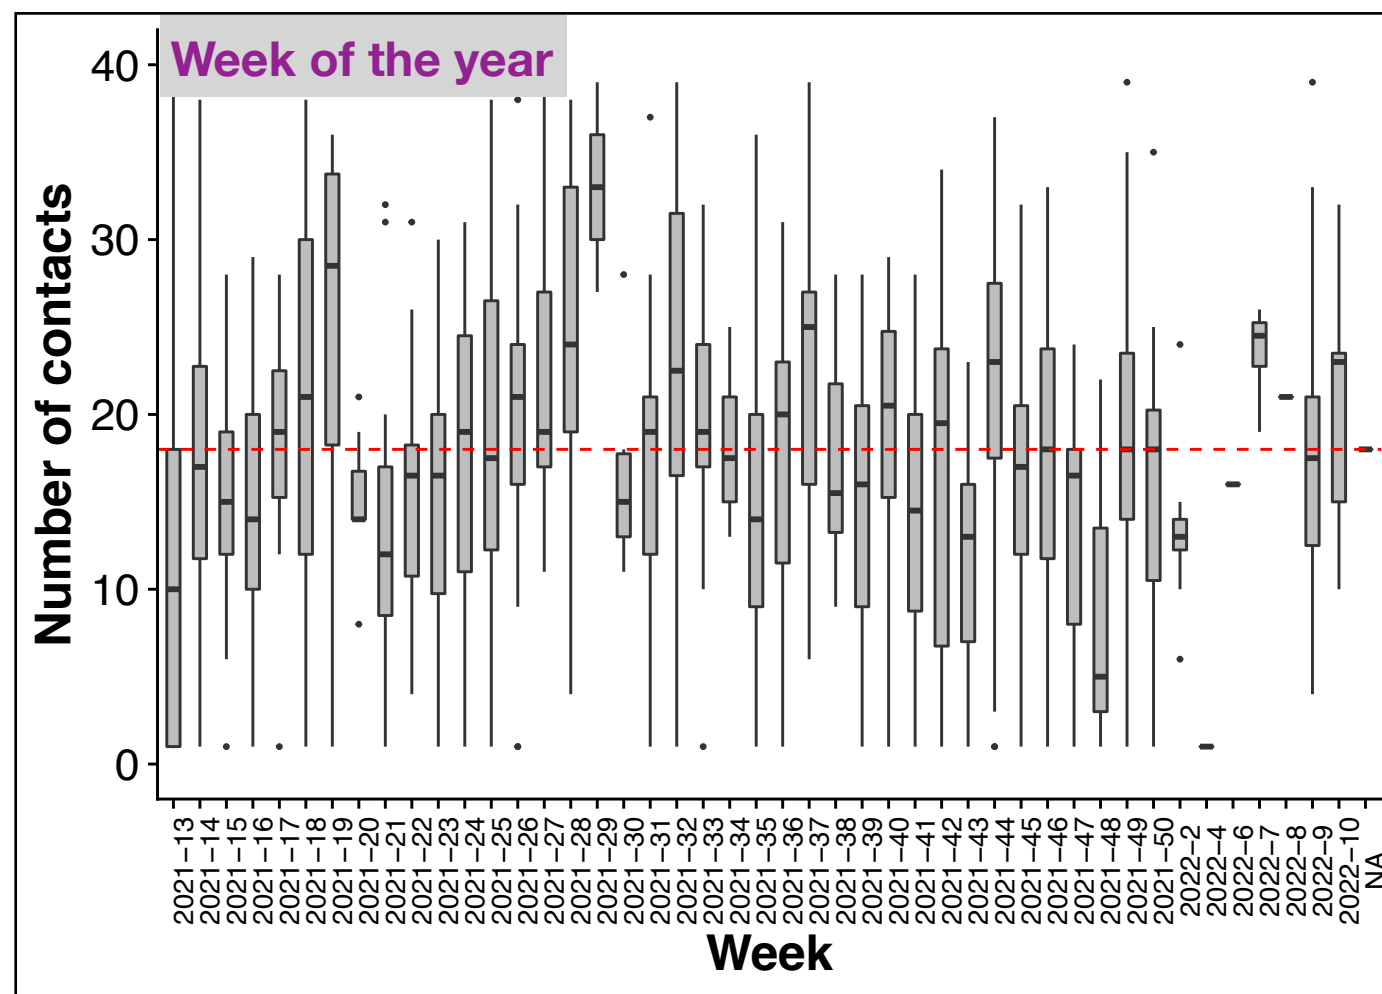

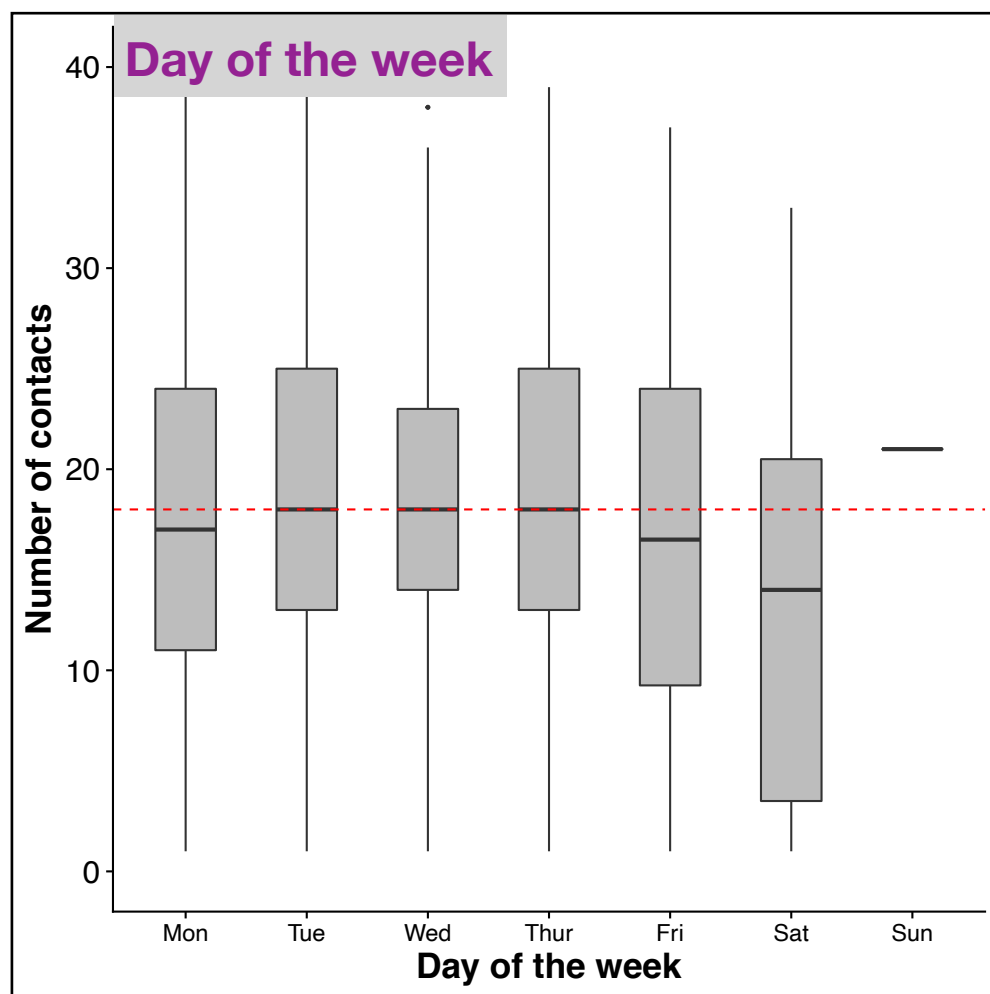

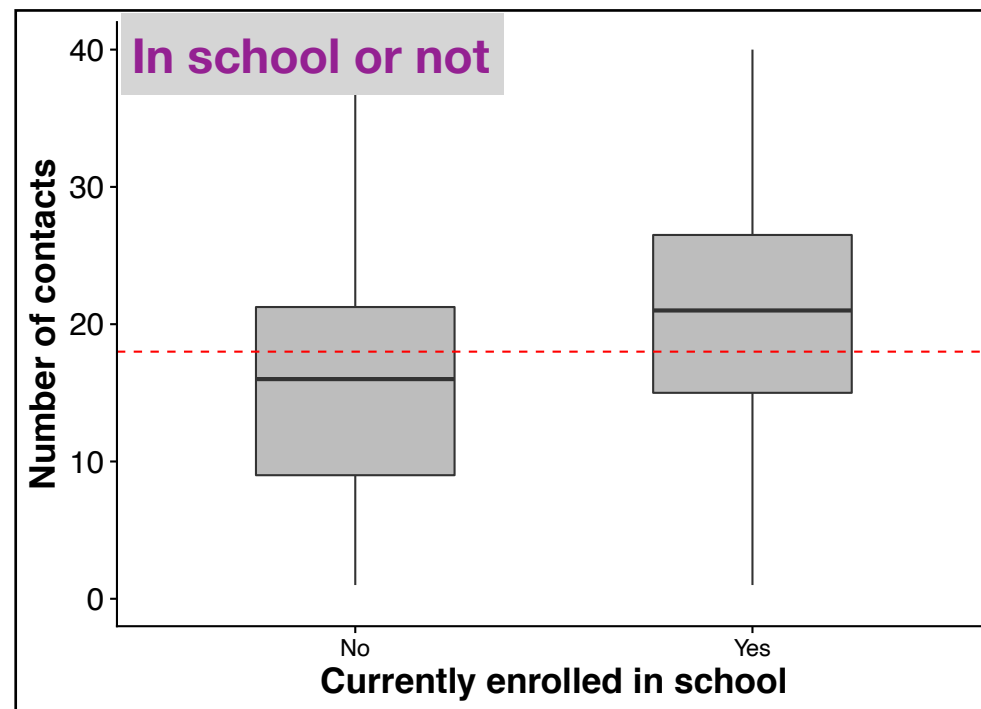

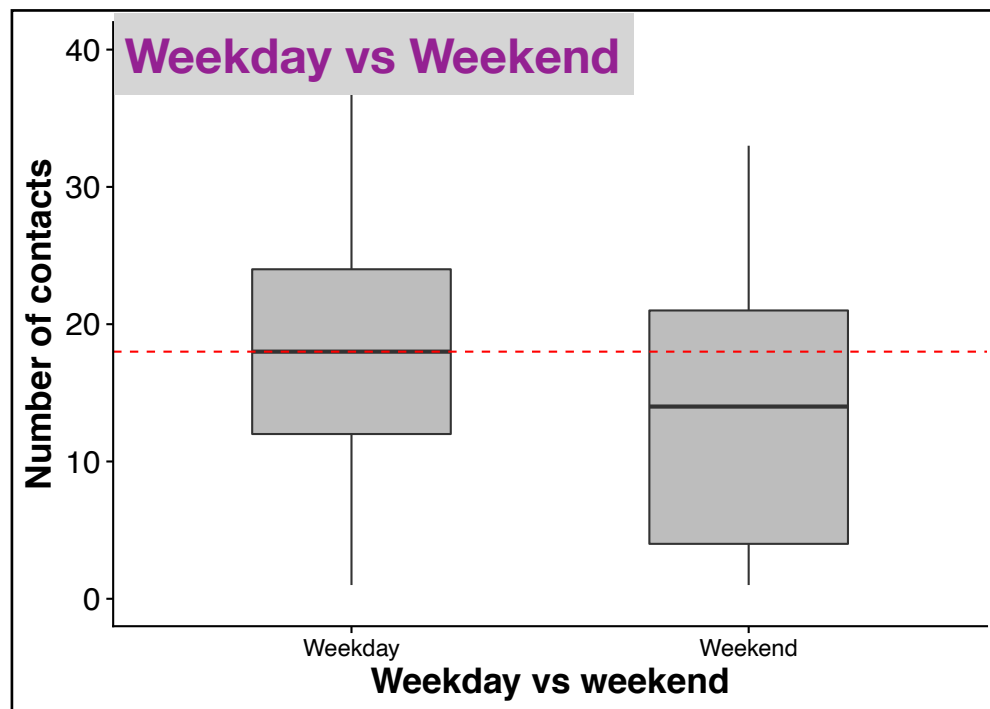

One way summary tables

Distribution of reported contacts by age in Manhiça only for Aim 1

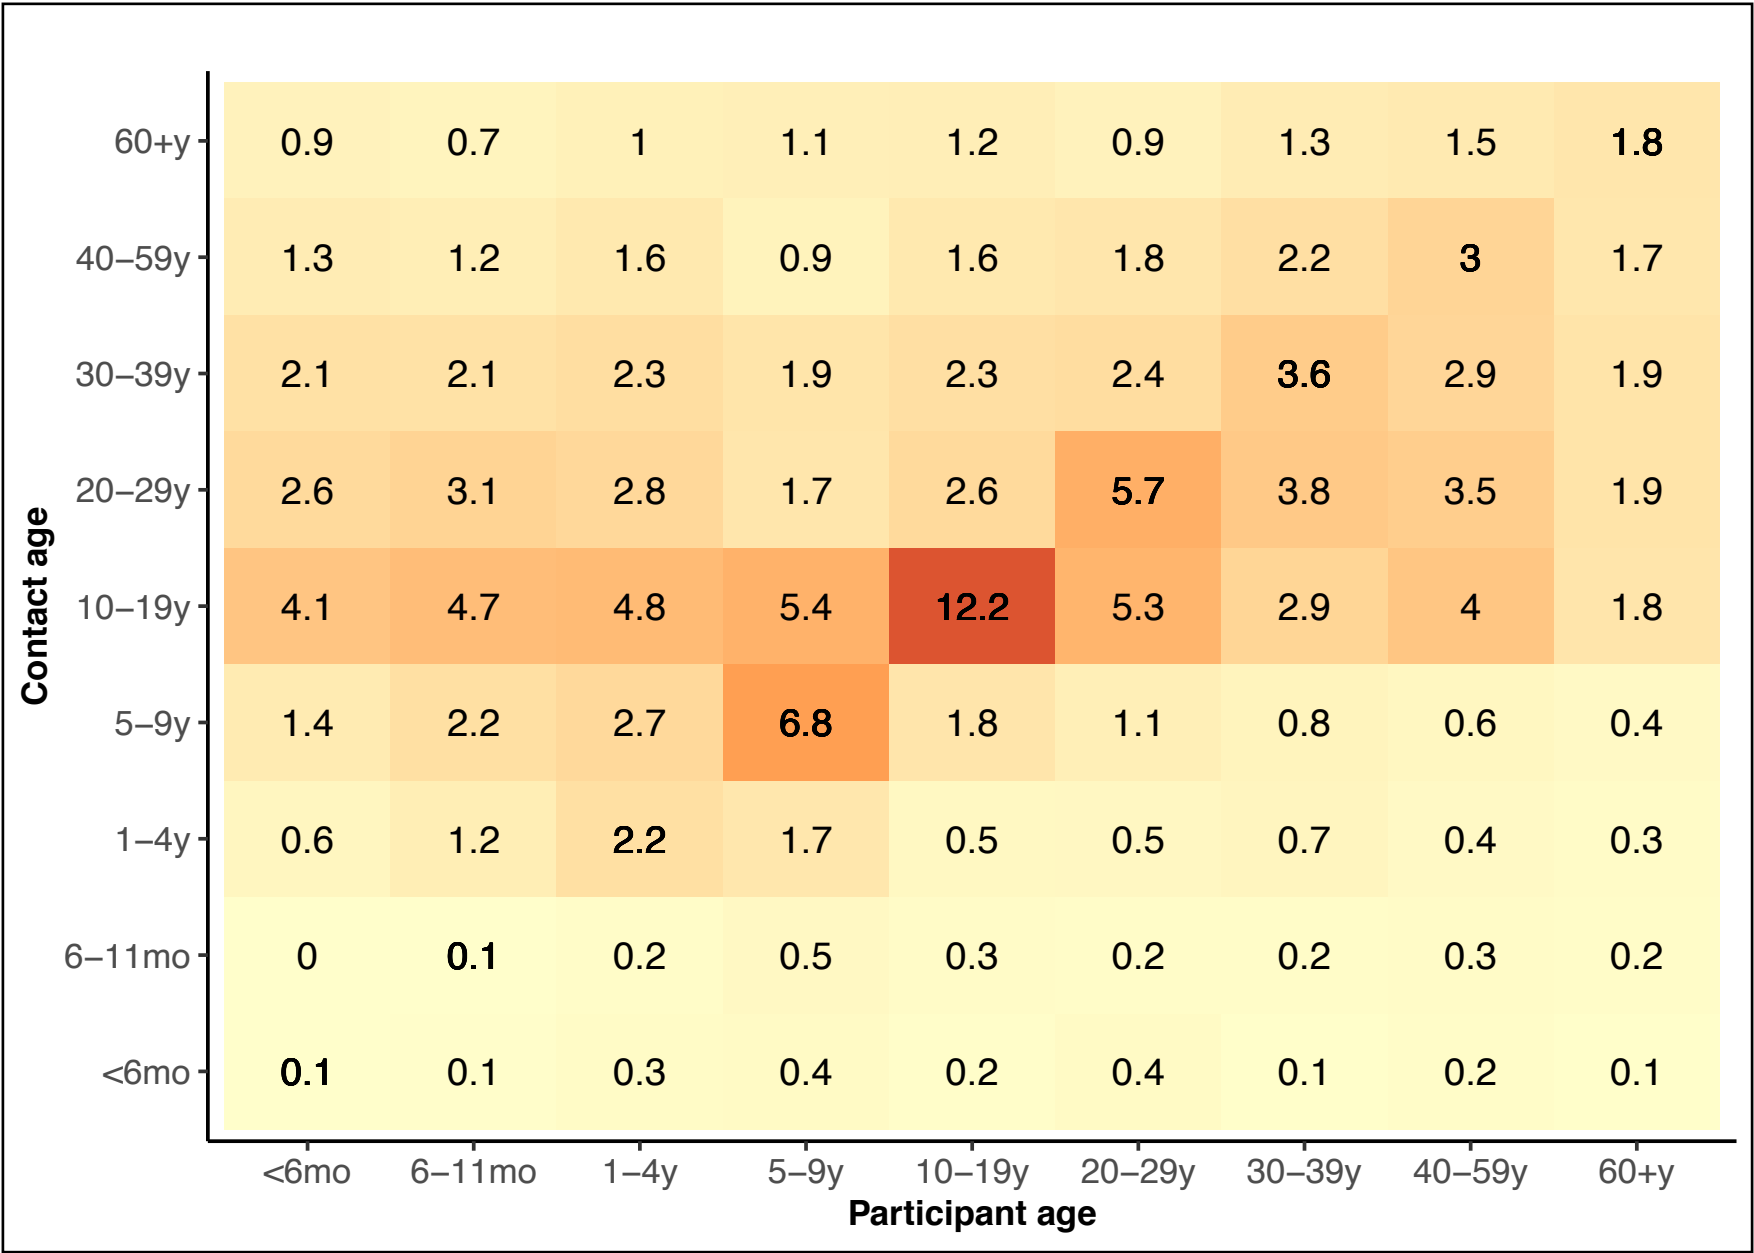

----- Median

Overall contact matrix

Very first thoughts...

- <5y report high contacts with 10-59y. Poor reciprocity in reported contacts. Could it be due to self vs shadow reporting?
- Miscoding of 10-19y group, should have been 10-14y and 15-19y.

Literacy

	No	Yes
<6mo	26	2
6-11mo	62	1
1-4y	51	1
5-9y	57	9
10-14y	22	43
15-19y	1	64
20-29y	3	61
30-39y	16	51
40-59y	36	56
60+y	46	18
